1. QUICK SETUP

1.1. INSTALL

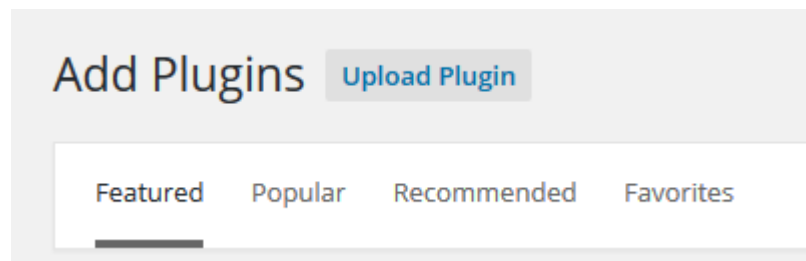

- Upload and Activate the „**Gravity Forms QR Code**“ Plugin
- Setup a new feed for your form and define the fields to generate a QR code
- Define if you need to attach the QR Code with your notification eMails or confirmations

2. UPLOAD AND ACTIVATE

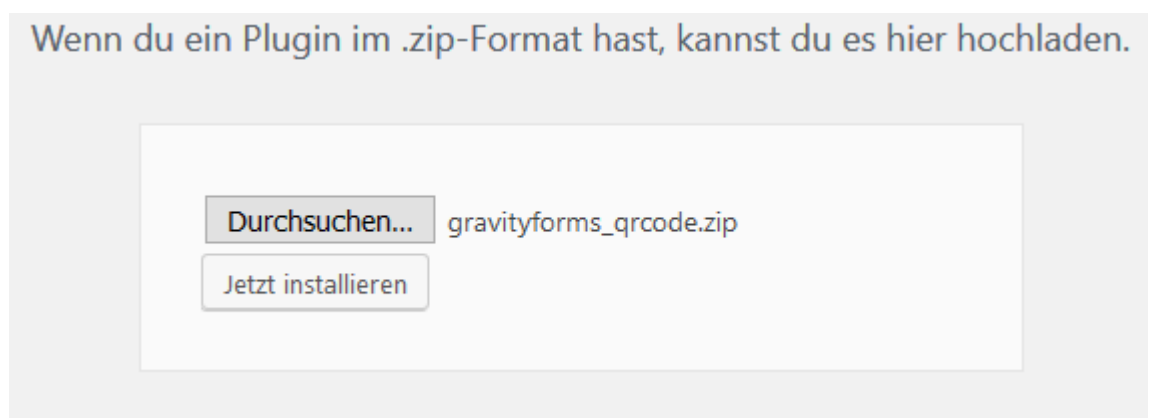

2.1. UPLOAD

After you downloaded and saved the '**Graviy Forms QR Code**' Plugin you have to upload it to your Wordpress installation.

Please go to you 'Plugins/Add New' Menu, select 'Upload' from the top links and choose the downloaded ZIP-File at the upload-field.

After selecting the File please press the „Install Now“ Button.

2.2. ACTIVATE

After the Plugin is uploaded you will get a success screen.

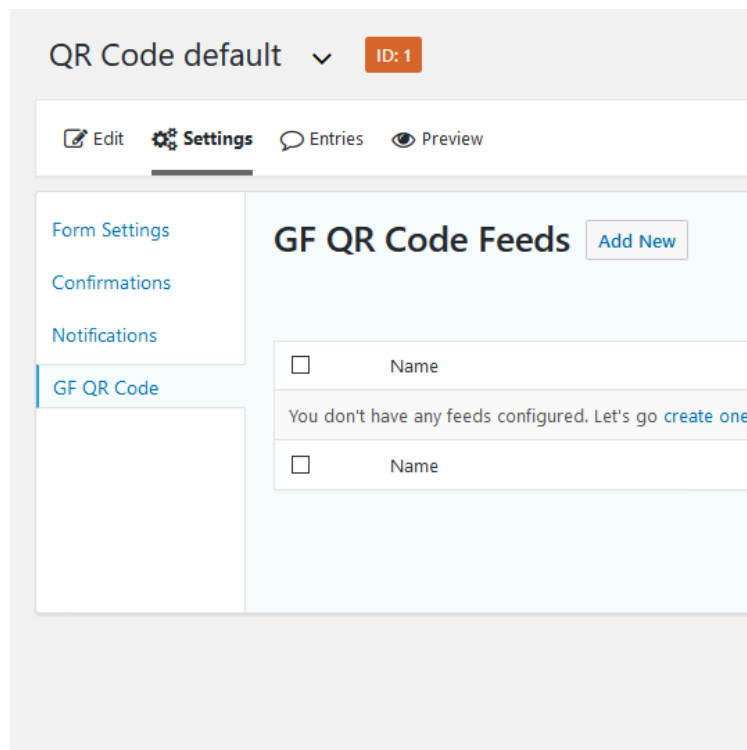

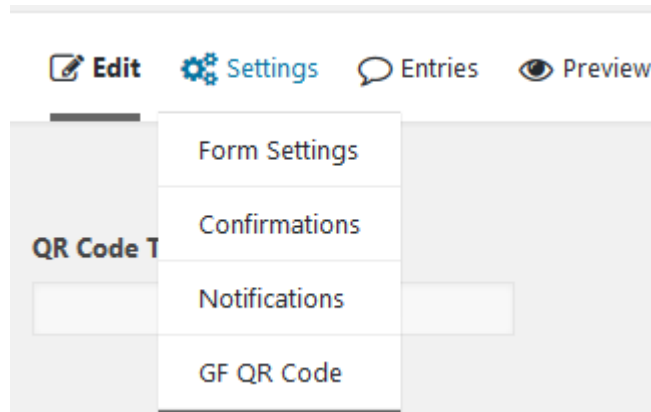

Please use the link „Activate Plugin“ to activate the plugin.

Or activate the plugin from your plugin menu.

<input type="checkbox"/> SP Gravity Forms QR Code Activate	Use Gravity Forms to generate QR codes from submitted forms Version 1.0.0 By Ralf Fuhrmann Visit plugin site
---	---

3. SETUP YOUR FORM AND FIELD SETTINGS

To generate a QR Code you need to add a new QR Code feed at the GF QR Code settings.

3.1. SETTING UP THE DATABASE TABLE

At the Gravity-Forms Feed Settings you have to setup a name for your feed, a label that will be displayed under the QR code and the size of the generated Image.

Feed Settings

Default QR Code Fields

Feed name  *	<input type="text" value="GF QR Code Feed 2"/>
QR Code Label  *	<input type="text" value="under the code"/>
QR Code Size  *	<input type="text" value="400"/>

Template Fields

QR Code Fields 	<input type="text"/>	Name (First) 	 
	<input type="text"/>	Name (Last) 	 
	<input type="text"/>	Website 	 

<i>Field</i>	<i>Description</i>
Feed Name	A name for you feed.
QR Code Label	A small text that will be displayed under the QR code
QR Code Size	The size of the PNG Image file of the QR Code in pixel

3.2. FIELD SETTINGS

At the “Template Fields” section you can setup the fields of the form that will be used as data to generate the QR Code.

You also can setup any text you need at the input field for any qr-code line.

Placeholders :

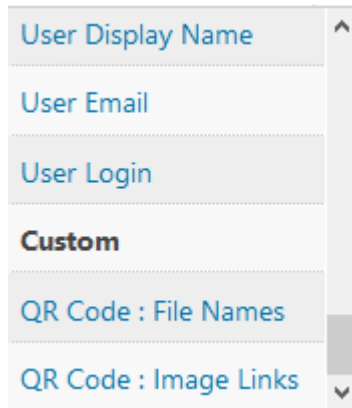

{tab} to insert a TAB

{space} to insert a SPACE

{newline} to insert a NEWLINE

4. ADD YOUR QR CODE TO A CONFIRMATION

At the default Gravity Forms Confirmation Setting you can use two new Merge-Tags to insert your QR Code to your Confirmation.

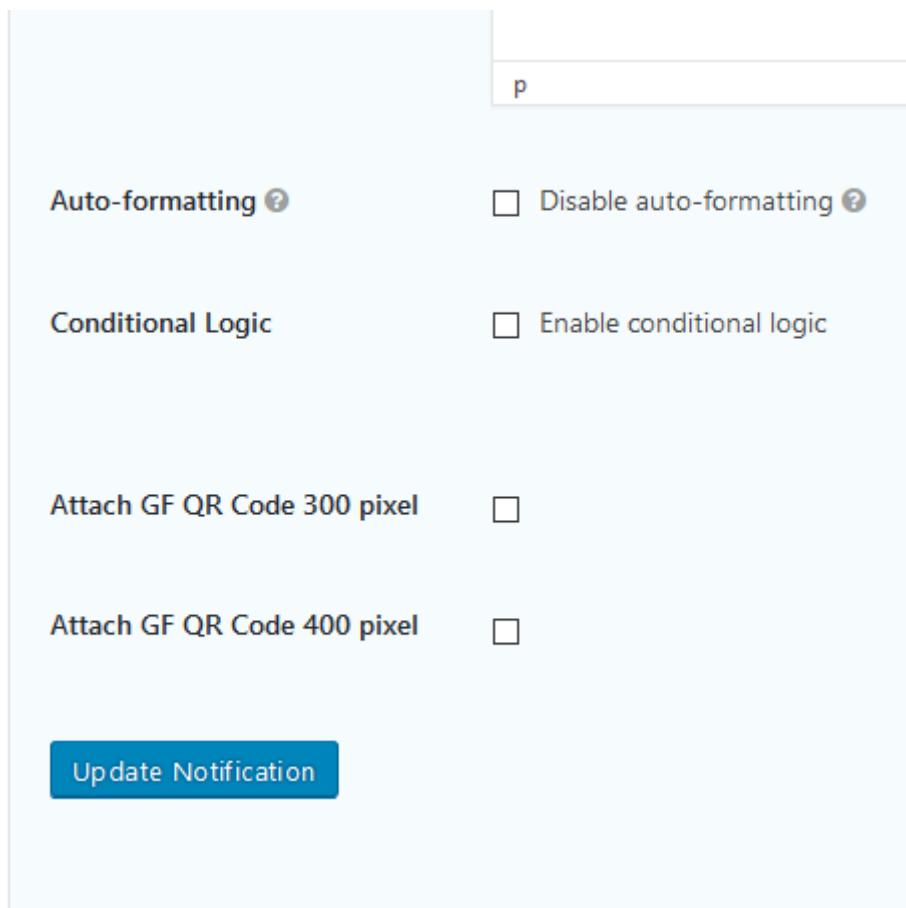

<i>Merge Tag</i>	<i>Description</i>
QR Code : File Names	Will be replaced with the name of the generated QR Code files.
QR Code : Image Links	Will be replaced with a HTML Image (IMG) link of the generated QR Code files.

5. ADD YOUR QR CODE TO A NOTIFICATION

At the default Gravity Forms Notification Setting you can use two new Merge-Tags to insert your QR Code to your Notification (See point 4)

You also can attach the generated QR Code files as attachment to the Notification eMail.

The screenshot shows a notification settings panel with a light blue background. At the top right, there is a small white box containing the letter 'P'. Below this, there are four settings, each with a label on the left and a checkbox on the right. The first setting is 'Auto-formatting' with a help icon, and its checkbox is labeled 'Disable auto-formatting' with a help icon. The second setting is 'Conditional Logic' with a checkbox labeled 'Enable conditional logic'. The third setting is 'Attach GF QR Code 300 pixel' with an unchecked checkbox. The fourth setting is 'Attach GF QR Code 400 pixel' with an unchecked checkbox. At the bottom left of the panel is a blue button labeled 'Update Notification'.
